### **DETAILED ACTION**

This Office action is in response to the amendment filed December 6, 2004 in which claims 1 and 3 were amended.

The rejection of the claims over 35 USC 112, second paragraph is withdrawn in view of the amendment to the claims. It should be noted that in claim 1 the term "of" should be inserted in after "consisting essentially".

#### ***Specification***

1. The disclosure is objected to because of the following informalities: at page 6, paragraph 23 of the specification applicant discloses that when the gases are passed through the fuel that C-NO<sub>2</sub> compounds are formed. It is not clear what compound has such a chemical formula.

Appropriate correction is required.

2. Claims 3 and 5 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. the step of how the nitrous gases are produced does not further limit the fuel conditioning method. Also, the step of using the fuel after the passing step in a cold-start phase of an internal combustion engine does not further limit the fuel conditioning method.

***Claim Rejections - 35 USC § 112***

3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear which nitro compounds are formed. Are these compounds inorganic or organic? Applicant has disclosed compounds of the formula C-NO<sub>2</sub>. However, this does not appear to be the formula for any known compounds. Clarification and correction are required.
